# USB card versions

The USB transmits red and green light when it communicates with the PC. If only one lamp is lit during duplication the up- or down-link is not working. Please report which light (red or green) that you can see!

Old version.

Identify how: Dark green colour. Green text saying Copyright 2008.

Action: ALWAYS replace

Old modified version.

Identify how: Dark green colour. Green text saying Copyright 2008. Soldered capacitor on back
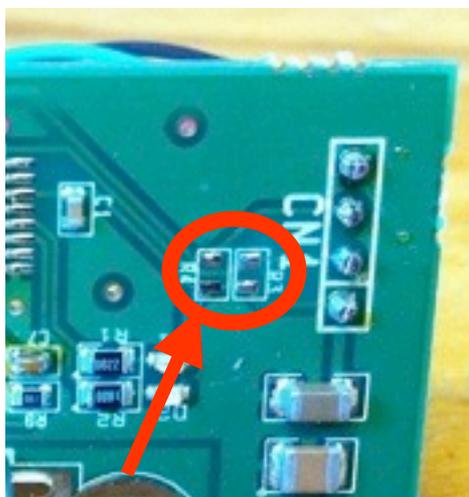

Action: none needed

New version.

Identify how: Light green colour. White text saying Copyright 2008-2010.

Resistors in place

Action: None

Resistors missing

Action: replace if Duplimate stops with "Card jam" message (at normal duplication without slowing down).
