

VISTA PROBLEMS WITH HANDPRINT, MAKEABLE AND IMPORT_EXPORT

When running any of the above programs for the first time you might get the following error message.

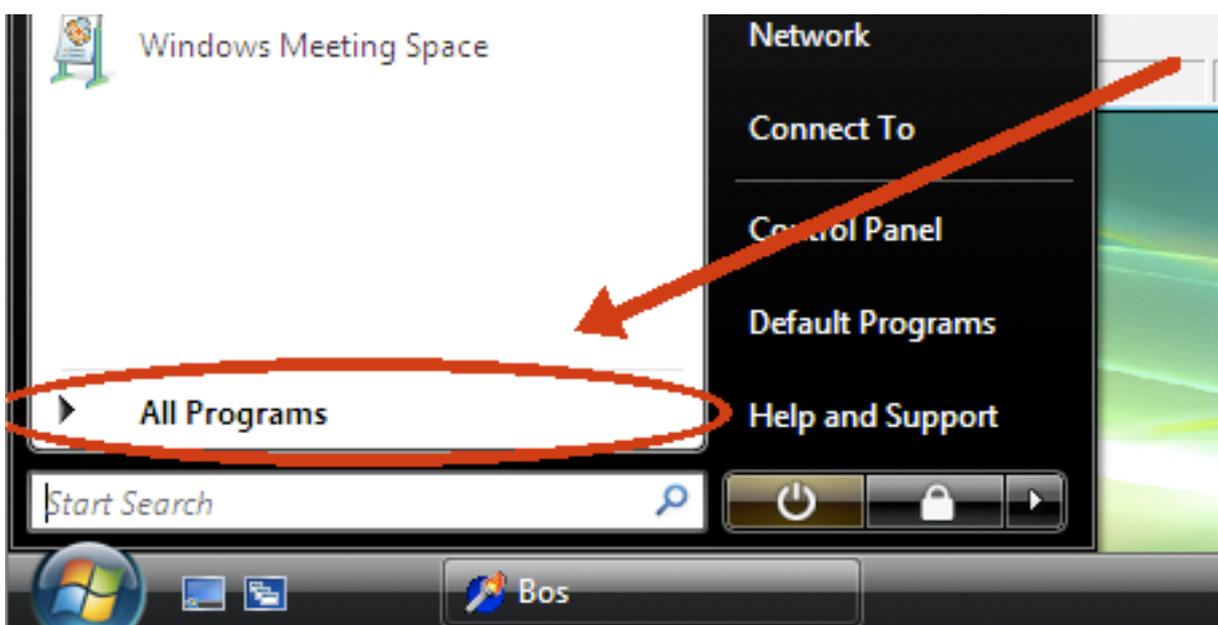

The problem can be solved by unregistering the .ocx file in question. The following steps describe how to do this:

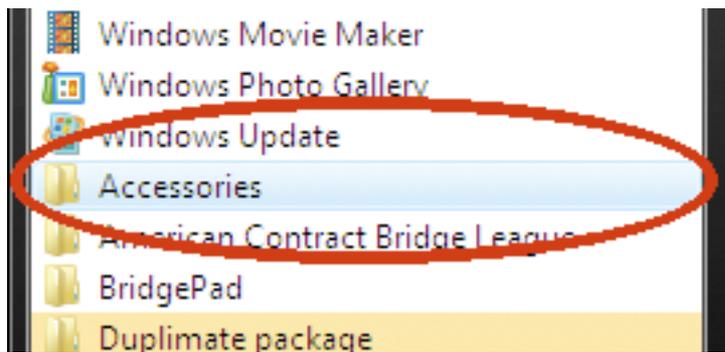

1. Click the start button in the lower left corner of the screen

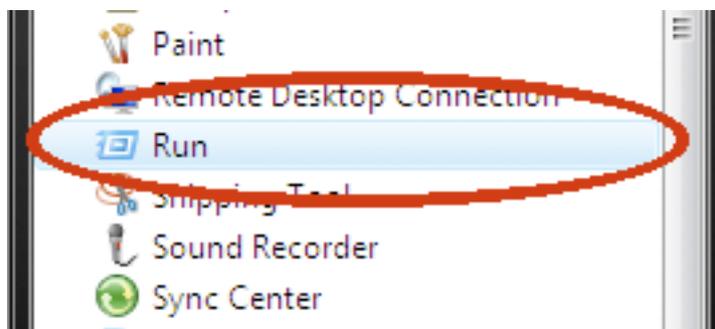

2. Choose "All Programs"

3. Choose "Accessories"

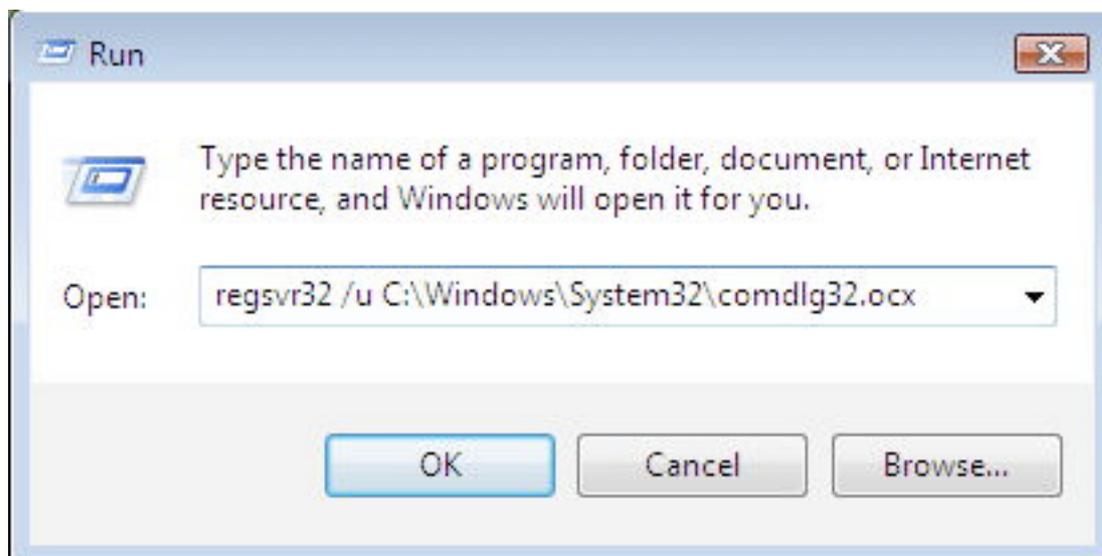

4. Choose "Run"

5. In the Run window, type (or copy):

regsvr32 /u C:\Windows\System32\comdlg32.ocx
(Note that there must be a space before C:\...)

and press OK.

6. You may have to repeat the described procedure for each and all .ocx files that generate an error message.
